

A33 Substrate Wetting Agent

Overview

A33 is a high-performance non-silicone substrate wetting agent, recommended for water-based coatings requiring dynamic wetting.

Reference technical specifications:

Appearance: Transparent liquid

Active content: Approximately 100%

Chemical composition: Nonionic surfactant

Applying recommendations:

- Substrate wetting
- Anti-pinch effect
- Promote leveling
- Defoaming
- Reduction of Static Surface Tension
- Reducing dynamic surface tension

Typical application:

Wood Coatings

Automotive Factory Paint

Traffic Coatings

Printing Inks

Recommended amount:

0.1-1.0% of the total formulation

Description of the process:

The specific dosage should be adjusted by the customer according to actual conditions.

Package and storage:

Store in a dark place, keep unopened and stored at 5°C to 35°C. The product has a shelf life of 12 months from the date of production.

25kg per barrel, with customized packaging for customers.
